*UK manufactured premier quality garden buildings*

**log cabins**

# Woodlands Log Cabins

With over 30 years of experience in manufacturing timber garden buildings, we began looking towards the log cabin market during early 2004, at which time this growing market was filled with potential customers who were dissatisfied with the quality and service on offer via cheap imported log cabins. With this in mind, we set our goals to resolve the problems of current market offerings and create a UK manufactured range supported by a specialist UK based sales and service team.

We are proud to be able to say that none of our log cabins are imported or externally manufactured or machined, we have our own UK mill, owned and staffed entirely by ourselves.

This gives us complete control over the manufacturing process from start to finish meaning we can oversee the quality of our timber. Any timber found to be inferior is simply not used. Our extensive range of specialist equipment and machinery is manned by skilled and experienced members of staff and means our log cabins are built to the highest quality.

With a growing fleet of modern delivery vehicles, we can deliver products throughout most of the UK directly to your home. The vehicles are bought from new and serviced regularly allowing us to provide a reliable delivery service and stick to our timed delivery slots. Providing access is sufficient we will deliver our log cabins on 18ton HIAB trucks. The vehicle has its own built in crane to take the log cabin straight off the vehicle and on to your site. Unlike many competitors, we advise you not only of a delivery date but also a two hour time slot so you don't have to stay in all day.

## 19mm Chamfered Interlocking Logs

Our 19mm log cabins offer a much better quality yet cost effective alternative to a standard garden shed or summerhouse. If it's a log cabin you like the look of and budget is key, then one of the 19mm log cabins we have on offer is just for you. Our 19mm log cabins come complete with pre-assembled floor and roof components making installation as easy as possible.

## 28mm Chamfered Interlocking Logs

Our 28mm log cabins are manufactured to the highest quality standards. 28mm log cabins come with a specially designed four way chamfered notch system to prevent damp or wind penetration.

The wood is comprised of high quality European softwood providing a log which is built to last the distance.

## 44mm Chamfered Interlocking Logs

Our extra thick 44mm log cabins feature a double tongue and groove joining system to an extremely high quality. The extra thickness of the logs provides the added warmth, security and protection you need. Each log has a specially designed four way chamfered notch system to prevent damp or wind penetration and is comprised from high quality slow grown European softwood. This is much less prone to warping and splitting than faster grown cheaper timber which most other companies use.

## Floor and Roofing Specification

Our 19mm log cabins come with pre-assembled floor and roof panels making assembly as easy as possible. They are comprised from 12mm thick tongue and groove boards supported by rounded four corner 28x44mm framing / floor joists.

Our 28mm and 44mm log cabins feature an easy-fit modular floor for a fast and easy assembly with weatherproof pressure treated 58x44mm floor bearers. Cheap competitor imitation log cabins generally supply log cabins with individual 'do it yourself' floorboards which can be problematic and time consuming. The roof and floor is made from 19mm extra thick tongue and groove boards.

Image Shows Modular Floor Piece For 28/44mm Log Cabins

## General Specifications

- Log Thickness: 19mm, 28mm or 44mm
- Roof: 44x120mm roof purlings support 19mm planed tongue and grooved roof boards
- Green mineral felt is supplied as standard with all log cabins within the range
- Decorative felt shingle roofing is available as an optional extra
- Floor: 44x57mm tanalised (pressure treated) floor bearers are spaced at 400mm centre's (as is standard in most houses). These bearers support heavy duty 19mm planed tongue and grooved floor boards.
- Doors & Windows: Joiner made doors and windows are supplied fully glazed or fully boarded
- External doors are fitted with mortice locks as standard.
- Treatment: Apart from the floor bearers, all cabins are supplied completely untreated. *It is strongly recommended that the buildings are treated inside and out with a high quality spirit based preservative within 14 days of installation, weather permitting.*

## Optional Cabin Planters

Raised Bed

28mm Planter

You can choose from a range of flower beds and planters to give your garden plants a home they deserve. The 28mm thick planters have the dimensions 600(W) x 600(L) x 385(H) mm. The raised flower beds are comprised of 19mm thick logs.

## Guttering

Make your Log Cabin complete with this black easy fit guttering system. Guttering will go on both sides of the log cabin.

The guttering is pre-attached to a board which is simply nailed to the top log on the underside of the roof. There is then a downward pipe that fits in at the corner of the log cabin allowing water to run to the ground.

## Shaped Barge Boards

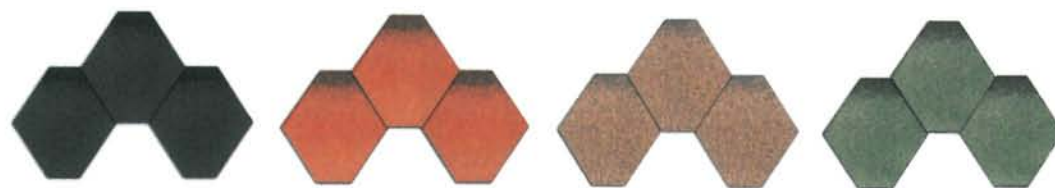

As standard our Log Cabins come with straight bargeboards but we also decorative shaped bargeboards giving your new Log Cabin an alternative look.

These are finished to our usual high standard and come with shaped finials for a complementary look.

## Shingles

Heavy duty green mineral roofing felt comes as standard with your log cabin but why not complete the look of your log cabin by adding some alternative roof shingles in your choice of colour, available in green, red, brown or black. The shingles we provide are of premium quality shingles available. They are self adhesive and need to be nailed onto the roof boards. Our roofing shingles come from a market leading manufacturer and are typically used for houses as they have a 40% bitumen rate.

## Decking Extensions

Add a new dimension to your cabin with a sturdy & functional Floor Deck Extension. Our quality manufactured Deck Extensions come in 28mm and 44mm log thicknesses and sit on tanalised heavy duty (44x57mm) floor bearers. The decking itself is made using 28mm thick tanalised 28x120mm decking boards. Deck Extensions can be fitted to the front or the side of most cabins.

44mm & 28mm Logs

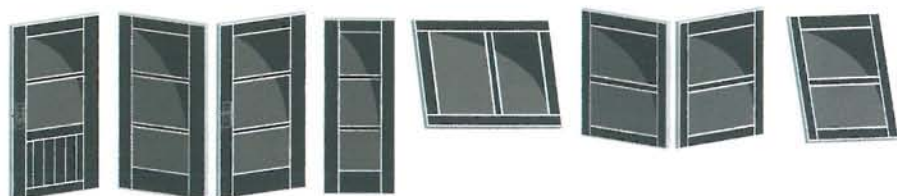

Almost every cabin within the 28 and 44mm ranges can be modified to fit the door and window type or style of your choice from the options listed below. Consult your local price list for details of changing door and window options. Please note that unless specified your cabin will be supplied with the standard style of doors and windows for that range as illustrated in the brochure.

## Euro Style

Modern European style range of cabin doors and windows

## Fully Boarded

Workshop style fully boarded doors

## Georgian Style

Traditional Georgian style of cabin doors and windows

## PVC Options

PVC option window and double doors come as standard double glazed with toughened glass.

## Full Pane

Contemporary styled 'full pane' windows come as standard with toughened glass.

When completed, your local agent will be able to work with you in creating your dream woodlands log cabin. Tick all options that apply to your building and leave the boxes blank if they are not required.

The image shows a full page of graph paper. The left portion of the page is covered by a standard square grid. On the right side, there is a vertical rectangular area designated for notes. This area has a header section at the top containing the word "Notes" in a bold, black font. Below the header is a large, empty white space for writing, which is separated from the rest of the page by a thin black border.

- Change the size of the building – its length, width or even the height.
- Change the thickness of the interlocking logs.
- Easily add or remove windows, doors and partitions.
- Alter the styles of doors and windows to any of those shown on the Doors/Windows page.
- We offer standard glazing, double glazing, toughened glass or even toughened double glazing.

To help with a more accurate quote please note down the door/window codes on the diagram where you need them to be. These are listed beside the options on the page opposite.

your local agent:

## Why You Should Buy Our Log Cabins

- **LOG THICKNESS AND TIMBER QUALITY** - Our log cabins come with high quality interlocking logs made from European softwood. Cheap competitor imitations tend to come with rough edged boards machined from poor quality cheaper Baltic softwood.
- **UNIQUE LOG NOTCH SYSTEM** - Our log cabins feature a unique and specially designed 4-way tight fit chamfered notch system, leaving no room for damp or wind penetration. Cheap competitor imitation log cabins often feature square cut logs and square notch-joints which will then leave the logs with a sloppy joint and large visible gaps.
- **UK DESIGNED, MACHINED & MANUFACTURED** - We have our own mill, owned and staffed entirely by us where we have complete control to oversee the quality of the timber - any timber found inferior is simply not used. We then take care of the whole manufacturing packing and delivery process ourselves, in house! Cheap competitor imitation log cabins are generally imported leaving you with no idea where it has come from and who has been responsible for its manufacture.
- **DOORS AND WINDOWS** - Our log cabins feature oversized extra large doors and windows, which are professionally joiner made, draft sealed and silicone beaded internally and externally. Cheap competitor imitation log cabins generally come with smaller ill-fitting doors and windows which are hung externally using low quality pin hinges - these are more prone to twisting and warping.
- **LOG CABIN HEIGHT** - Our log cabins are extremely high at both the eaves and the ridge providing a maximum useable space within a given footprint base size. We can offer to reduce this for no extra charge. Many cheap competitor imitation log cabins are already very low and not flexible enough to offer variance in heights.
- **FLOOR QUALITY AND FIT** - Our log cabins feature an easy-fit modular floor for a fast and easy assembly with weatherproof pressure treated floor bearers. Cheap competitor imitation log cabins generally supply log cabins with individual 'do it yourself' floorboards which can be problematic and time consuming.
